

PAGER Version 4

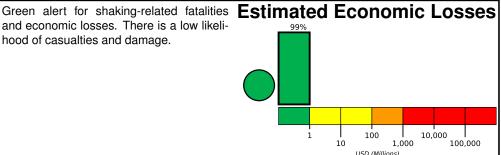

Created: 3 weeks, 0 days after earthquake

M 5.4, 10 km NE of Tuban, Philippines

Origin Time: 2021-10-02 21:59:26 UTC (Sun 05:59:26 local) Location: 12.8702° N 120.9053° E Depth: 8.8 km

and economic losses. There is a low likelihood of casualties and damage.

Estimated Population Exposed to Earthquake Shaking

| ESTIMATED POPULATION EXPOSURE (k=x1000) | | _* | 29,062k | 1,295k | 47k | 63k | 6k | 0 | 0 | 0 |
|--|--------------------------|----------|---------|--------|----------|----------|-------------|------------|----------|----------|
| ESTIMATED MERCALLI | MODIFIED INTENSITY | I | II-III | IV | V | VI | VII | VIII | IX | X+ |
| PERCEIVED SHAKING | | Not felt | Weak | Light | Moderate | Strong | Very Strong | Severe | Violent | Extreme |
| POTENTIAL DAMAGE | Resistant Structures | None | None | None | V. Light | Light | Moderate | Mod./Heavy | Heavy | V. Heavy |
| | Vulnerable Structures | None | None | None | Light | Moderate | Mod./Heavy | Heavy | V. Heavy | V. Heavy |

^{*}Estimated exposure only includes population within the map area.

population per 1 sq. km from Landscan

Structures

Overall, the population in this region resides in structures that are a mix of vulnerable and earthquake resistant construction. The predominant vulnerable building types are unknown/miscellaneous types and heavy wood frame construction.

Historical Earthquakes

| Date | Dist. | Mag. | Max | Shaking |
|------------|-------|------|-----------|---------|
| (UTC) | (km) | | MMI(#) | Deaths |
| 1999-12-11 | 344 | 7.2 | VIII(17k) | 1 |
| 1973-03-17 | 212 | 7.5 | VIII(6k) | 15 |
| 1990-07-16 | 318 | 7.7 | IX(893k) | 2k |

Recent earthquakes in this area have caused secondary hazards such as landslides and liquefaction that might have contributed to losses.
